20. Nominations made for the Fellowship of the Society shall remain in good standing for a period of five years.

Guidelines for the meetings of the SFE Selection committee per year on FSFE

(Composition of Selection committee to be decided by the EC, SFE)

(a) Before the commencement of the SFE selection committee meeting, the Secretary should call the attention of the Members to get the same signed and any action resulting from it. Conflicted member(s) are expected to recuse during discussion and making decisions. This has to be recorded in the minutes/proceedings of the respective SFE selection committee meeting.

(b) There will be two meetings of the SFE Selection committee each year; the first one will be held in February/March and the second meeting will be in the month of June/July.

(c) At the first meeting, the SFE Selection committee will aim to shortlist up to 30% of the total nominations received. If committee feels that there are more deserving candidates than 30%, the number may be increased with proper justifications. The committee will make all efforts to procure the opinion of the fellowship about the nominees. The opinions received by the committee should be thoroughly discussed at the meeting.

(d) A CV to be considered (for shortlisting or rejecting the nomination). Each nominee must receive approval of a majority of the SFE Selection committee members (grading should be indicated for all the nominees [e.g. A-Outstanding, B- Borderline]. All efforts should be made to come to a consensus for the selection of each nominee. In the absence of consensus, there should be voting to select suitable nominees.

The shortlisted nominations [who receive a maximum A will be shortlisted in order of merit/ratings] will be processed for referee evaluations. All the reference letters [minimum five] should have the name and address of the referee. There should be at least three Referees.

(e) Diversity & Inclusion:

It is highly desirable that two nominees may not be shortlisted from the same institute in the same committee except under exceptional situations giving full justification.

(1) It is highly desirable that the elected fellow represents diversity / two nominees with similar areas of research (e.g., phytochemistry, ethnopharmacology) may not make it to the final shortlist.

(2) While shortlisting the names, age/gender/geographical distribution/research areas may be taken into consideration by the SFE Selection committee members.

(f) The members of the SFE Selection committee should obtain referee reports in the area concerned from the Society Fellows. It is highly desirable to have at least 3 referee letters. However, a minimum of 2 buddy letters and 1 from other experts including International Experts are essentially required.

(g) Letters to reviewers may be sent out by an SFE Selection committee member. To maintain uniformity, a common format for recommendation letters (by the Society) be shared with all the members of SFE Selection committee for obtaining letters from the referees. All letters to and from reviewers should also be copied to the Secretary and EC.

(h) During the meeting of SFE Selection Committee, the opinion of experts (on each nominee) will be placed on the table and will be critically discussed. All the referee letters will be shared by the EC among the committee members with address and affiliations. The Committee will then make a final list of up to 50% of the shortlisted nominations. For each recommended nominee, the Committee shall also state the basis for its recommendation by highlighting the importance of the scientific contributions of the concerned nominee.

(i) The primary criterion for election to the Fellowship will be the scientific and technological achievements of the nominee (e.g. contributions to new knowledge, discoveries, development of new technologies, substantial improvement in existing technologies, etc.) as evidenced by publications, patents, authenticated scientific reports and the economic impact of his/her work.

(j) The work done in Ethnopharmacology should be given primary importance.

(k) The selection should be recommended based on the work done in the entire career of the scientist. The work done in Ethnopharmacology should be given more importance, and also notable contributions made that are relevant to the field. Work done well before the nomination is proposed should also be given due consideration.

(l) The Selection Committee is charged with the responsibility of studying the work of the nominees by consulting fellows/experts in the area of specialization of the nominee, where necessary.

(m) Both Application Scrutiny Committee and Selection Committee will be constituted by EC-SFE.

(n) The proforma application can be requested from the office of SFE with a fee of Rs. 250/-
